Professional Experience

Front End Developer, *Quickr*

10/2022 – present

- Translated Figma designs to visually appealing and functional user interfaces using React JS.
- Worked in a software development life cycle with a team of 6+ engineers to obtain the full logic for our React app.
- Contributed significantly in the maintenance of 50-60% of the front-end codebase, including the implementation of new features.
- Played a key role in a team re-creating a website from a mobile application, turning 50 pages into 4 web pages through 40 iterations to ensure a high level of quality and user experience.
- Led the creation of 1 landing page, user profile page, registration and sign-in forms with their authentication logic and fetching user's data from our API to display in user's profile.

Projects

Personal Projects

- Developed 9 projects featuring sellable landing page templates, dashboards with 6+ use cases, and various other applications such as Spotify and Youtube clones, a social media app, and an e-commerce website with 10+ features using React.js and basic JavaScript.
- Implemented over 20 reusable UI and React.js logic-based components for future projects.
- Translated 9 designs and wireframes into high quality code.
- Optimized 10+ components for maximum performance across a vast array of web-capable devices and browsers.

Education

Bachelor's degree in Computer Science, Information Technology, *Mansoura University*

09/2020 – 07/2024

- Developed strong foundational knowledge in programming, Data Structures and Algorithms, OOP and problem solving using C# and Python.
- Completed comprehensive training in the software engineering life cycle and agile methodologies, demonstrating a strong understanding of these concepts and methodologies.
